High Performance](#)

**CURADO DC BAITCASTING REEL**

Built on the legacy of durability, dependability and versatility that Curado is known for, Shimano's new Digital Control braking system utilizes a microcomputer to monitor spool speed 1,000 times every second and apply the perfect amount of brake to prevent backlash and maximize distance. Anglers of all skill levels will appreciate less thumbing and trouble-free casting in all conditions.

**TIRALEJO RODS**

The actions and guide settings of this series were meticulously designed to match perfectly with the Shimano Ultegra XTD and Ultegra C4+ surf reels. We refer to them as the Long Cast Concept, allowing surf casting anglers to achieve previously unachievable distances and catch those hard to reach fish. All new C4S blank construction allows maximum pulling power.

**STELLA SW REELS**

Smooth and durable, with high line capacities and stop-a-bus drag, the Stella SW is the favorite spinning reel among high-stakes saltwater anglers. With HAGANE Gear, HAGANE Body, X-SHIP and all the best, high-end Shimano technologies, Stella SW is the definitive saltwater spinning reel.

**TREVALA JIGGING RODS**

Winner of American Sportfishing Associations, JCAST New Product Showcase Award for Best in Category Rod. This highly innovative series is designed to be fished with the Shimano Butterfly jigs. These are powerful, light weight and light-action rods to be used with high speed, high power reels.

2020 DIGEST

## A Short Coast with Big Opportunities

Though New Hampshire has the shortest coastline of any state that borders an ocean, it offers great sport fishing opportunities: striped bass, mackerel, flounder, tuna, haddock, and more. Our recreational and commercial fisheries are a time-honored tradition and a significant contributor to the state's economy. I am a longtime seacoast resident, a former commercial fisherman, and I have held a lobster license for the past 20 years, so trust me when I say our seacoast has a lot to offer the saltwater angler.

New Hampshire's estuarine and saltwater species, including fish, lobsters, clams, and oysters, are managed by Fish and Game's Marine Fisheries Division, based in Durham. Biologists work closely with other state and federal agencies to protect and maintain marine resources and habitats for both recreational and commercial fisheries. These efforts are essential to rebuilding groundfish stocks, enhancing related habitat, and maintaining healthy populations of species such as Atlantic herring, striped bass,
