Yes! That is correct.

There were state minimum lengths prior to 2005 for Atlantic cod.

1985= 15"

1988=17"

1994= 19"

1998= 21" 10 fish creel (in aggregate with Haddock)

2003= 23" 10 fish creel (in aggregate with Haddock)

2005=Same as outside GOM Federal rules. Note: creel did change in 2005 to no longer be in aggregate with haddock at 10 fish.
