Total length (TL) is measured from tip of snout with mouth closed to top of compressed tail. Fork length (FL) is measured from tip of snout to middle of fork in tail. Lower jaw fork length (LJFL) is measured from lower jaw to middle of fork in tail. Curved fork length (CFL) is the measurement of the length taken in a line tracing the contour of the body from the tip of the upper jaw to the fork of the tail. Bag limits are not additive for state and federal waters.

Ocean boundary is defined as water seaward of the COLREGS Demarcation Lines as indicated on National Ocean Service navigation charts.

No one may possess aboard a vessel or while engaged in fishing any fish subject to limits without head and tail attached, except for alewife and blueback herring used for bait provided not more than two fish per boat/operation may be cut at any one time – Reference 15A NCAC 3M .0101
