

HISTORY OF FISHERY MANAGEMENT MEASURES

This is what I have for Atlantic Cod (see the attached file). The 2006 regs are still what we have here now. As far as I know the regs have been the same since 2006, but I am not sure. The person that tracked the regulations history for New York retired after 2006 and Cod was not kept up on. The other thing with Cod is that while we usually tried to mirror the federal regulations on them, there may have been some years that the federal regs were slightly different but I don't have the federal regulations history for them.
